# SMART REFILL

Meiyume's smart refill strives to be at once desirable and sustainable.

Our patented user-friendly refill system guarantees a premium experience for the consumer. The pod is released with a simple push on the notch.

Premium thick wall outershell in PET is combined with a minimalistic PP inner cup. All parts are using recyclable resins.

Post-consumer recycled (PCR) materials can be used for all parts. Inner cup refill can be sold separately with a removable top seal.
